Had Considerable Trouble.

The Electric & Water Company had a lot of trouble with their defective boiler before they got it into working shape. When repairs were started, it was found to be in much worse shape than they had expected, and the consequence was that more time was required than was estimated at first.

During an interview with Mr. Danielson last week that gentleman stated that some of the leads about the city were in bad shape and that it would only be a question of a short time before they would have to be rebuilt. If this is done it will mean the expenditure of considerable money, but it is the only way in which the plant can be put into proper shape.

Charles Parker, who has made his home in Montana for several years past, is in the city visiting his parents, Mr. and Mrs. Sam Parker. Charley is looking well and life in the western country seems to agree with him.

"Sir," rejoined the fair party of the shopping party, laughingly, "I am not going out to service."

Grand Rapids Banks Show their Strength.

Last week and the week before when the New York stock gamblers were having their panic and the wheat fields of the west were taking so much money, it seemed as though there wasn't enough to go round. Some of the banks in the middle west found it advisable to stop paying out money in large amounts, but the Grand Rapids banks made no change in their manner of treating customers. Our banks not only took care of the ordinary local needs but furnished cash for the numerous pay rolls. Farmers have been good here and the banks all save they are receiving money freely each day.

The only exception made to the regular course of business at the banks here is that they declined to furnish cash in large amounts on check and drafts on banks in other cities. This seems very reasonable as the cashing of such drafts is only a matter of accommodation and should not be expected at a time when so much money is required for the pay rolls and the moving of the crops.

Every bank in Grand Rapids is not only very strong in itself but is backed by stockholders of large wealth, and the citizens of Wood County are to be congratulated on having such safe depositories in which to keep their money.

During the past few days many millions of gold have been received from Europe and the reports show a decided improvement in the situation at New York as well as farther west. A little shaking up once in a while will do Wall Street good.

Lecture on Forestry. The lecture by Prof. Will on Forestry at the opera house on Saturday evening was not as largely attended as it should have been to get the best results. Those who attended report that it was an interesting and instructive talk.

It is unfortunate that more people do not interest themselves in this matter, but it is probably a fact that very few people realize at this time that the citizens of Wisconsin need interest themselves in this matter.

We have been busy during the past twenty-five years in ruthlessly slashing down one of the greatest growths of timber that a state was ever blessed with, and as yet we hardly realize what we have done. The present generation will never see the damage repaired, but it can start a work that may be carried forward by future generations.

Killed in a Runaway. Anton Brodkerb, a farmer living west of Nekoma, met with a fatal accident on Thursday night of last week, dying from his injuries on Sunday night.

Mr. Brodkerb had hauled a load of lumber to Nekoma and was returning home on the empty wagon, being seated on the seat. When a short distance from Nekoma his team took fright at something and ran away, throwing the driver to the ground and one of the wheels passed over his neck.

He was given medical assistance but never rallied from his injuries, being unconscious most of the time, and he died on Sunday night.

Deceased leaves a widow and seven children. The remains were taken to Chicago for burial.

County Board in Session. The County Board convened at the court house at two o'clock on Tuesday afternoon, Chairman Wm. Hooper presiding.

Bills and communications to the board were read after which an adjournment was taken until two o'clock this afternoon to allow the committees to do their work.

It is reported that there are a number who are willing to take either office.

Directory of Wood Co. A representative of the International Directory Co. of Cleveland, O., has been in the city during the past week soliciting orders from our business men for the new book which the company expects to issue some time in January.

They state that there are eight men at work in the book and that when completed the book will contain the name of every person in Wood county, with his occupation and postoffice address. The book when completed will sell for three dollars, and the collector claims that it is necessary to sell 700 books in order to pay the cost of compiling the work.

BIG KENTUCKY FLOP

BLUE GRASS STATE GOES REPUBLICAN, CHOOSING WILLSON AS GOVERNOR.

JOHNSON IS REELECTED

Defeats Congressman Burton for Mayor of Cleveland—Hearst Party Is Soundly Whipped by Tammany in New York.

Washington.—Six states elected governors Tuesday and fifteen cities mayors. Even for an "off-year" the election was unusually full of features, but Kentucky furnished a sensation by swinging into the republican column by pluralities of the state candidates ranging from 6,900 to 10,000. The republicans also carried the city of Louisville by 3,500 majority for their majority candidate. Results of the gubernatorial elections were as follows:

The fusion between the republicans and the independence league was a failure, except in the cases of a few minor officials.

TIMBER FOR ONLY 20 YEARS

SUPPLY IN UNITED STATES WILL THEN BE EXHAUSTED.

Government Forester Pinchot Sounds Warning, Saying Natural Resources Must Be Protected.

Washington.—"In 20 years the timber supply in the United States, on government reserves and private holdings, will be exhausted, although it is possible that the growth of that period might extend the arrival of the famine another five years."

This announcement was made Monday by Gifford Pinchot, the government forester, who has just returned from a six months' inspection trip, on which he traveled 10,000 miles. In sounding his warning, Mr. Pinchot urged that the danger of the situation should not be underestimated. He said that the United States uses more timber per capita than any other country, and that every man, woman and child would be affected. He declared the policy of discounting the future of the country by failure to protect the natural resources, and he advises everyone who has not already done so to read President Roosevelt's speech at Memphis on this general subject.

About one-fifth of the forest area of the country is in government reserves, but Mr. Pinchot called attention to the fact that as privately owned timber lands are better than the government's, as a general rule, the government does not control one-fifth of the timber supply. The forest service will ask congress for more money and more men in order to extend the service, and will push the work of reforesting the denuded timber lands. Mr. Pinchot says, however, that it is utterly beyond the possibility of the service to meet the situation and prevent serious trouble. One hope entertained is the Appalachian forest and an effort will be made to protect this and promote the growth there.

President Roosevelt expects to call a conference in Washington shortly of government officials and experts in the study of natural resources. "The conference will be for the purpose of developing sentiment in favor of the administration's policy of looking into the future in the matter of conserving the natural resources, such as timber, coal, oil and gas, and the like," Mr. Pinchot said. "It is the duty of the administration officials that when the people realize that the increase in lumber prices, which began in 1900 and has continued rapidly since that time, was based not on actual shortage of supply but upon the fact that the owners of private tracts of timber land were merely looking into the future, the government policy will be endorsed without question."

Results of the gubernatorial elections were as follows:

San Francisco, Cal.—B. R. Taylor, Dem., and Good Government league.
Cleveland, O.—Tom L. Johnson, Dem.
Cincinnati, O.—L. Markbreit, Rep. Louisville, Ky.—J. F. Grinstead, Rep.

MONEY TO MOVE THE CROPS

NEW YORK BANKS NOW SENDING ALL THEY CAN SPARE.

Cortelyou Orders \$3,000,000 Deposited in Minneapolis and St. Paul—Financial Conditions Improve.

New York.—Now that the monetary straits have been lessened locally, the New York banks began preparations Wednesday to ship all available currency to the northwest to aid the movement of crops.

While there is concerted action among the city's banking institutions to meet the demands for currency now being made by banks in the crop country, the individual banks will send all funds that can possibly be spared for the purpose.

Estimates of the combined amounts that the New York banks will send to the northwest within the next six weeks vary. The Chase National bank has announced to ship daily sums ranging from \$25,000 to \$50,000 to banks along the route of the Great Northern and Northern Pacific railroads. James J. Hill held a conference here with officers of the Chase National and other institutions, at which it is stated he asked that the northwest be given all possible assistance to move the crops.

Mr. Hill was informed that while the local banks could not furnish the usual amount of money for crop moving purposes, they were anxious to do all they could to expedite the shipment of cereals to the seaboard, where they could be sent abroad and thereby strengthen this country's position in the foreign money markets.

It was learned here that the amount of the government deposits directed by Secretary Cortelyou to be placed in St. Paul and Minneapolis is \$3,000,000, and that this sum will be forwarded from Washington. "The local subtreasury, it was ascertained, is prepared to ship funds west should Secretary Cortelyou deem it expedient."

The general conditions of the financial situation were favorable Wednesday. The runs on the trust companies had practically ceased under the encouraging influence of the support of the trust company committee; gold engagements were further increased, and the stock market rose buoyantly in recognition of these conditions.

HITCHCOCK BACK ON STAGE.

He and Wife Weep When Audience Cheers Him.

New York.—Raymond Hitchcock, who gave himself up to the authorities Wednesday, reassumed his role at the Astor theater Wednesday night and was given a demonstrative welcome. The actor looked haggard and ill, and his voice was uncertain as he spoke his lines. Meanwhile, his wife, who plays opposite him, was in tears and with difficulty followed her cue.

At the end of the second act the comedian stopped in the front of the stage and in a tremulous voice said: "I want to thank you all for your applause and encouragement. I hope I shall always deserve it."

Upon Mrs. Hitchcock's second entrance the action called upon her to shake her husband's hand. As they stood there with hands clasped the cheers were deafening, and for a moment both performers seemed unable to continue. Then Miss Zabelle placed her hand on her husband's arm. Hitchcock broke down completely and there were a good many wet eyes in the audience, too.

CASH FROM HIDING

HIGH PREMIUM RATES ENTICE IT FROM SAFETY VAULTS.

Sure Sign of Returning Confidence—Foreign Banks Put Up Discount Rate to Preserve Their Reserves.

New York.—The magnet of high premium rates for currency is attracting the money hoarded by depositors in steel vaults and strong boxes, and within the last few days over \$3,000,000 has been sold for a premium to money brokers.

The placing of these large amounts of hoarded currency in circulation is performing its important work in lessening the monetary stringency and brokers are confident that more currency will soon find its way into circulation from safe deposit vaults, the owners of which, now being reassured as to the financial future, are anxious to take advantage of the large premium rates.

The reappearance of gold hidden away in apprehension is a sure sign of returning confidence and belief that the storm has passed, according to money brokers, who likewise are in a position to take advantage of the present situation.
